1. Exports

Animal exports to Gulf States, particularly Saudi Arabia, represents the largest share of the Somaliland export earnings. The three types of livestock that somaliland exports are; Sheep/Goat, camel and cattle. Other commodities that accompany the livestock export include skins, hides and seafood, which are the main exports that somaliland traders share with the rest of the world.

1.1. Livestock Exports: Jan-December 2021

The table (1) below illustrates the category of livestock market share per type of exports. The price of livestock per type is listed in the table below and was collected by a particular team from Macroeconomics & Statistics Department who targeted livestock markets across the regions of Somaliland. The quantity of livestock exported during Jan-December 2021 is multiplied by the current local Livestock price per head, which gives the total value of export. Figure 1 clearly specifies that sheep/goat has the largest share of livestock exports of **94%** and **5%**, **1%** are secondly to Cattle and Camel respectively.

**1.2. Commodities Exports: Jan-December 2021**

Other than livestock, Somaliland's exports are not particularly that significant. Few commodities are exported through the main port of Berbera and Zaila border. Table 2 below shows list of items that Somaliland exports to other countries. Skins, hides, gums, fish, Powder Soap and watermelon hold prominent positions in terms of quantities exported. The values in the table were collected by the Macroeconomics & Statistics Department. The data varies sometimes significantly from current local market prices.

1.3. Comparison of Livestock Export Jan-December 2020/2021

As the comparative figures between 2020 and 2021 in table 4 below show, Jan 2021 has the highest percentage increase in exports compared to the same month in the previous year. In aggregate livestock exports in the year of 2021 were 69% higher than exports of the same period in 2020.

Table 4: Comparison of Livestock Exportation Jan-December 2020/2021

As figure 2 below shows the comparison between the two annual statistical reports of Jan-Dec 2020 and 2021, June has the highest difference in 2020/2021 which records positive percentage of 252%. This figure shows a clear seasonal pattern in the exports of livestock.

Figure 2: Comparison of Livestock Exportation (Sheep/Goat) Jan-Dec 2020/2021

On the other hand, as table 5 below and figure 3 show, camels were exported during the fiscal years of 2020 and 2021. Camel export of March 2021 has the highest amount of export and rate of 2308%, while July has the highest amount of difference negatively. Because livestock exports follow a seasonal pattern, this is an exceedingly low rate of export. January, December and February 2021 is having also high rate of 359%, 370% and 204% respectively of export difference. The months of April to November in 2021 have lower camel exports than the months of April to November in 2020. In aggregate, Jan-Dec 2021 camel export has decreased 53% according to the Jan-Dec 2020 camel export. This is also showing significant monthly variation in the export of camels.

As can be seen in table 6 and figure 4 below, Cattle are the second largest livestock export after sheep and goats. The table indicates that Jan-Dec 2021 cattle exports has decreased 10% according to Jan-Dec 2020 cattle exports. The month of August has the highest decrease of cattle export 69%, while October and December have the lowest decrease of cattle export 10%.

2. Imports

Somaliland imports a wide range of products consisting mainly of food items, petroleum products, building materials, machinery and equipment, consumer goods, pharmaceuticals, tobacco and motor vehicles, etc. The bulk of the imports originate from Ethiopia, China, Kenya, U.A.E, Yemen, Saudi Arabia, India, Thailand and Malaysia. Table 7 below shows the import of containers through Jan-Dec 2020/2021 and has 9% negative import containers compared to 2020. The countries with the most import containers are India, United Arab Emarites and China as shown in Appendix 3.

The trade of kat and its consumption play a significant role in the economy. It provides an employment opportunities to thousands of people and it is a main source of revenue for the Ministry of finance, however, Kat trade constitutes a big drain on the measure foreign currency resources of the country.

Taxation of imports/exports could be a primary source of potential revenue but it is constrained by lack of regulation and effective promotion of trade.

Unlike most developing countries which grow their food, Somaliland relies on food imports despite enough arable land in the country. This is mainly due to the nomadic way of life and the subsistence food production mode that is prevalent in Somaliland. Tables of 8 & 9 illustrate the import classification into seven categories, while food stuff and shoppings have the major value and duty rate of import , 32% and 35% respectively. This import classifications are extracted from the attached Appendix 1.

2.1. Trade Balance: Jan–Dec 2021

The figure 5 below shows the trade balance of Somaliland in the fiscal year of 2021. Somaliland registered a trade deficit of **\$2,346,793,407**. To close the real value in invoices, the recent years (2020 and 2021) in the main items of imports like food stuff, building materials, clothes, shoes etc, the Ministry of Finance used approximately the cost, insurance and freight (CIF) which means that 40% of the shelf price of imported items is assumed to be the invoice value whereas other 60% to be costs, losses, profit margins etc. Previously the value was based on the Customs valuation Book, which to some extent uses values far below (Extremely Undervaluation) the invoice values of the commodities.

Figure 5: Net Trade Balance of Somaliland 2021

*:This value is based on current market value collected by the Department of Macroeconomic and statistics. Since the traders don't display the invoice value of the commodities, the department derived invoice value from the selling/shelf price of the commodities which shows the invoice value is 40% of the selling/shelf price whereas 60% selling/shelf price is the cost, profit and loss issues.

$$\text{MV} = \text{LMP} - \text{CPL}$$

Where **MV**= Marginal Value (Invoice Value)

LMP= Local Market Price

CPL= Cost Profit and Loss
